UI PATH

1. Introduction Module

Introduction to RPA
Introduction to automation with UiPath
Overview of UiPath architecture

2. Getting started with UiPath

Software requirements and installation
Designer Panel
   Ribbon
   Universal Search Box
   Activities Panel
   Design Panel
   Library Panel
   Project Panel
   Properties Panel
   Outline Panel
   Output Panel
   Control Panel

3. Working with Process & Workflow

Workflow types
Sequence
Flowcharts
State Machine

Working with processes
Creating a process
Managing a process
Edit
Compare
Delete
Execute
Process Validation

SevenMentor
PVT.LTD

4. Working with Variables

Defining variables
Assigning variables
Data types of variables
Variable Operations
Arithmetic Operations
Logical operations
Variable Arrays
Variable Dictionary
Managing arguments in workflows

5. Conditions and Loop

If-Else
While
Do-While
Switch
Flow-Switch
Flow-Decision

6. Excel Automation

Excel Basics
Excel activities
Working with data tables
Data table activities
Working with CSV files

7. File & Folder Automation

Automating file operation
Automating folder operations

SevenMentor
PVT.LTD

8. Web Automation

Web automation basics
Selectors
Full selectors
Partial Selectors
Wild cards in selector
UiPath Explorer
Screen Scraping
Web automation activities
Working with various types of web elements

9. Recorders

Basic Recorder
Web Recorder
Desktop Recorder

10. Email Automation

Email basics
Sending emails
Receiving emails
Processing email with logic
Processing email attachments

11. PDF & Image Automation

OCR
Data Extraction for PDF
PDF Activities

12. Release Management

Release packages
Export and Import
Log management

SevenMentor
PVT.LTD

13. Exception Handling

Error Management
Exception Handling

14. Orchestrator

Orchestrator Basics

15. Re-Framework

Various stages of Re-Framework
How to implement RE-Framework in projects
